

\$\$SURF is a utility token of the Ever Surf ecosystem designed as a bridge between users and service providers

Use cases

Users who own \$\$SURF tokens and have them in their account immediately gain access to the loyalty program. The greater the loyalty, the greater the benefits.

For users	For service providers
Increased percentage of income from staking	Lock \$\$SURF token to access the interface, Everscale's audience and the Ever Surf platform
Cashback from said services	
Reduction of service fees	Locked funds guarantee the integrity of service providers and will be used to pay cashback under the loyalty program
Reduction of exchange fees via DEX	
Increase in insurance payments via partner services	
Premium features, such as Smart Rebalancing Savings (with higher APR)	
Other bonuses, such as a free Surf Security Card	

Additionally, there are mechanisms that do not provide access to the loyalty program, but provide benefits to owners of \$\$SURF: community pool for staking (average APR) and provide liquidity paired with a \$\$SURF token (high APR).

Release

Token	
Total supply	100,000,000
Ticker	SURF
Standard	TIP-3 initially, DFT
Contract	TBD

Allocation			
Incentivization	20 %	Team	10 %
Reserve fund	20 %	Advisors	4 %
Seed sale	20 %	Community sale	3 %
Strategic sale	10 %	Public sale	2 %
Private sale	10 %	Liquidity pool	1 %

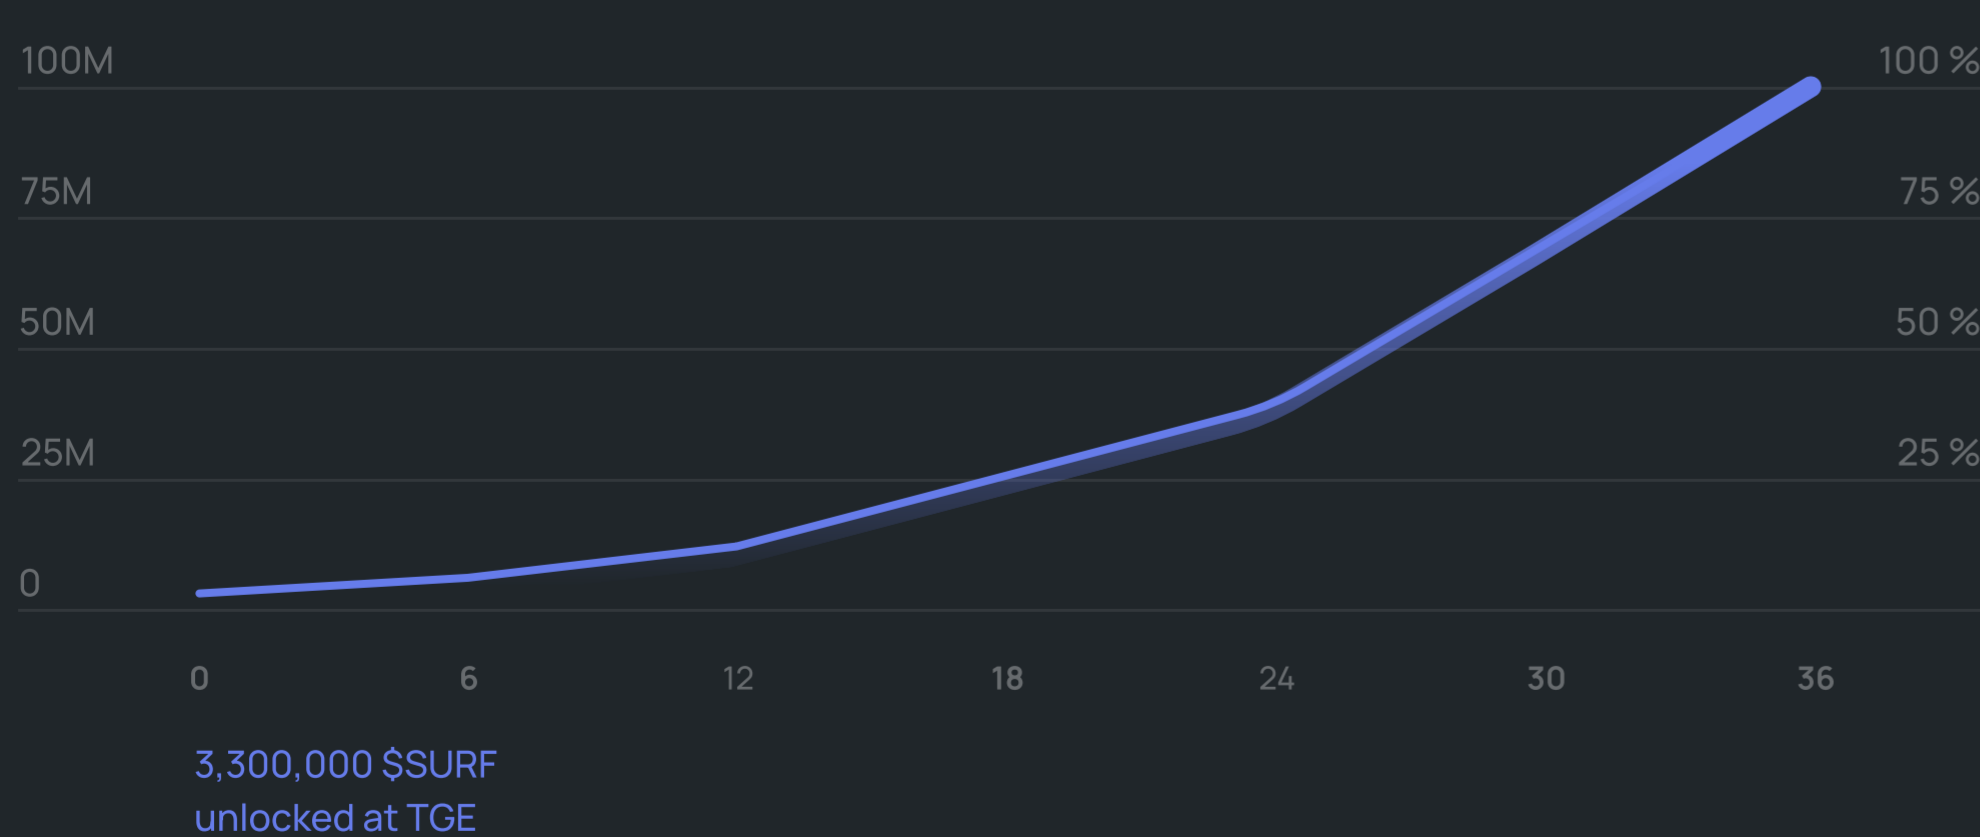

Sale stages

Sale stage	Percentage	\$\$SURF amount	Price	Total	Status
Seed	20 %	20,000,000	\$ 0.1	\$ 2,000,000	Sold out
